## Professional summary

---

A hard working and passionate student with strong organizational skills, eager to learn about new technologies. Being a self-thought programmer, I plan to work on my technical skills (problem solving and communication) and take my professional journey to the next level.

## Experience

---

2019 - PRESENT

- **Frontend development**

Started my career by learning frontend. Gave me a good warm-up to the world of programming and I enjoyed it. I developed a very good experience on Html, CSS and JavaScript and some other frameworks like Bootstrap and Sass.

2021 - PRESENT

- **Backend development**

After I got comfortable with the frontend, I took a python course and started to develop my career around it. Now I'm diving deep into the backend with a popular python framework (Django) and learning about APIs and Django's REST framework.

## Programming Languages

---

- Python
- JavaScript
- Html/CSS
- SQL

## Skills

---

- Dependable and Responsible
- Organization and Time Management
- Attention to Detail
- Planning and Coordination
- Active Listening

## Projects

---

- **Website for group chat** | Python, Html, CSS, JavaScript

A full-functioning website that allows users to chat by creating a room.

- **To-do list** | Python, Html and CSS

Provides an interactive interface for users to manage their task

- **Path-finding Algorithm** | Python

Algorithm to find the shortest path between two points in a maze

## Education

---

I'm a senior student in high school. I have a good academic background. Awarded student for being one of the top performers in the 2019 regional examination.
